**Detailed Office Action**

***Status of the Claims***

1. Claims 1-12 are pending in the instant application.

***Information Disclosure Statement***

2. The information disclosure statement filed 25 January, 2002, has been placed in the application file and the information referred to therein has been considered.

***35 U.S.C. § 103(a)***

3. The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Subject matter developed by another person, which qualifies as prior art only under subsection (f) or (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.

4. Claims 1-12 are rejected under 35 U.S.C. § 103(a) as being unpatentable over Lane et al. (2001). Lane and colleagues disclose methods for the potentiation of immune responses to infectious agents (e.g., HIV-1) through the administration of interleukin-2 (IL-2). While this teaching does not disclose the administration of IL-2 in amounts sufficient to comply the WHO grading system, nevertheless, one of ordinary skill in the art would have been motivated to follow such guidelanes to ensure the safe

administration of the compound.
